ATTN: Miami County, KS Board of Commissioners

Dear County Commissioners:

As a longstanding resident of Miami County, KS I am requesting that you carefully consider the best interests of your constituents and not those of special interest groups that may offer various incentives to vote in their favor. We would all agree that development in the proper locations and with the proper motives is good for Miami County. However, it does not take much research to find out that North Point Development is a company that should not be allowed to develop any projects in Miami County. They have thrived on deception across the country much like they have done in southern Johnson County, KS and in the long run their practices have caused more problems for local economies and residents than provided long term benefits. If we are unable to stop them at the county line, all they will do is destroy the beautiful countryside and people's property values in northern Miami County.

Please be diligent in considering all aspects of the incorporation of Golden, KS in these coming weeks. Once you have done that I think you will agree that this process of incorporating Golden, KS is proper and necessary to protect northern Miami County, KS and its residents.

Sincerely,

Douglas G. Brooks
